What is the Essence of the «Natural Living Being»? In what environment will that Living Matter remain as a form of Essence? What is the Primal Source of Being for the developmental function and harmony with the interactional counterpart created by the Natural Living Being that is the Living Source of Energy, with the existence of the waves it radiates? Therefore, the forms imposed by force may be in conflict with the respective wave forms, which do not correspond to the existing environment and create an opposition to the realization and existence of the Natural Living Essence.

Everything is like an joint activities of Energies and ripples according to the laws of quantum physics, which have not been canceled as units of measurement, which represent and justify the resonance of the Biorhythms of the inner and outer Being both in the body and beyond its borders with the forms of perception in the metric field, as Alpha-Omega with all the rest of time left behind the flow of cycles in drawings, numbers, letters, symbols,... in all the left images and forms of perception on the «Earth» and beyond.

Kas ir Dzīvas Dabiskas Būtības Esība? Kādā vidē paliks tā Dzīvā Matērija, kā Būtības forma? Kas ir Primārais Esības Avots attīstības funkcijai un harmonijai ar mijiedarbības ekvivalentu, kuru rada Dzīva Dabiska Būtība, kas ir Dzīvs Enerģijas Avots, ar to izstaroto viļņu esamību? Līdz ar to ar varu uzspiestās formas var būt pretrunā pret attiecīgo viļņu veidiem, kas neatbilst pastāvošajai videi un rada pretdarbību Dzīvās Dabiskās Būtības īstenošanai un Pastāvēšanai.

Viss ir kā Enerģiju kopdarbības un viļņojumu starpposms pēc kvantu fizikas likumiem, kas nav atcelti kā mērvienības, kas attēlo un attaisno iekšējās un ārējās Būtības Bioritmu rezonansi gan ķermenī un ārpus tā robežām ar uztveres formām metriskajā laukā, kā Alfa-Omega ar visu citu atstāto laika ciklu plūsmu zīmējumos, ciparos, burtos, simbolos,... visos atstātajos attēlos un uztveres formās uz «Zemes» un ārpus tās.

atio / ratio

[1630–40; < L *ratio* a reckoning, account, calculation, deriv. (see-tion) of the base of *rēri* to judge, think] the etymology of “corporation” is derived from the two (2) 16th Century Latin words: «corpus» which means «(dead) body»; and: «ater/atio» which means «funeral rights, dark, gloomy or dismal» ; Therefore «corporation» means literally “an association of one or more performing the funeral rights associated with the burial rituals of dead corpses”.

trust

<https://www.law.cornell.edu/wex/trust>

A **trust** is a form of division of **property rights** and a **fiduciary relationship (maritime)** in which ownership **(maritime)** of assets goes to a **third party**, known as a **trustee**, and the beneficial enjoyment goes to the **beneficiary**. The person who transfers the property into the trust known is as the **grantor** or **settlor**.

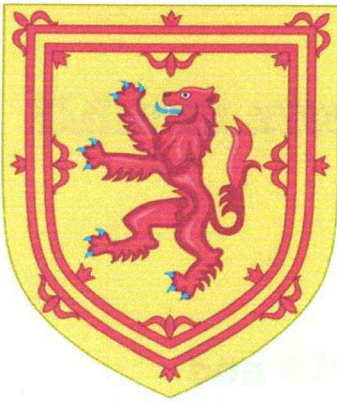

Trust is a right, enforceable in **equity**, to the beneficial enjoyment of property held by another party who actually holds legal title. The property held may itself be called a «**trust**», especially if it consists entirely of invested money (i.e., a **trust fund**).

The formation of a valid trust requires:

- A **settlor** (the owner of assets)
- Intent and capacity (the settlor should have intent to create trust and a capacity to grant their property rights)
- A definitive **beneficiary** (this beneficiary should be reasonably ascertained now or in the future)
- A **trustee** (the person who holds and administers assets in the interests of the beneficiary)
- Assets
- Legal formalities (the trust should be compliance with the law of that jurisdiction, be in **writing, signed, and notarized**)

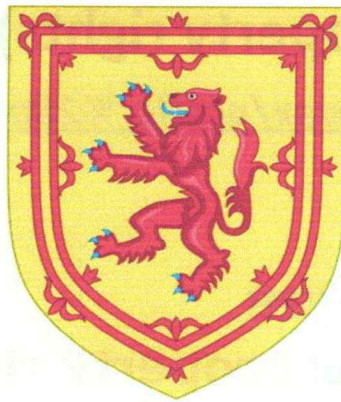

The trustee has **fiduciary duties** to perform in the interest of the **beneficiary**. The trustee and beneficiary usually cannot be the same person unless the trustee is not the sole beneficiary. If the trustee resigns, dies, or refuses to act as a trustee, the trust still exists. The court will appoint another trustee, called the **successor trustee**.

The trust assets may not be transferred to the trustee contemporaneously with the signing of the **trust instrument**. They can transferred be even after the death of the settlor.

FALSE FICTION OF HISTORICAL FACTS

THE CONSTITUTION OF THE REPUBLIC OF LATVIA

The State of Latvia, proclaimed on 18 November 1918, has been established by uniting *historical Latvian lands* and on the basis of the unwavering will of *the Latvian nation* to have its own State and its inalienable right of self-determination in order to guarantee the existence and development of *the Latvian nation*, its *language* and *culture* throughout the centuries, to ensure freedom and promote welfare of *the people of Latvia* and each individual.

The State of Latvia» < it is not «The»State» itself < but some «The State» from this territory - not the territory named «Latvia» itself, which has never been marked on any map, hence the wording «Latvian nation», «Latvian people», «Latvians», «Latvian culture» is an absolute fiction, a fact of rewriting history - COUNTERFEIT.

3. The territory of *the State of Latvia*, within the borders established by international agreements, consists of

Vidzeme, Latgale, Kurzeme and Zemgale.

Greater Coat of Arms of «the Russian Empire»

The state emblem of the Russian Empire is the official state symbol of the Russian Empire. Since the second half of the 19th century, there were three types of state emblem: Large Coat of Arms, also considered the Great Coat of Arms of the Russian Emperor, Middle Coat of Arms, which was also the Great Coat of Arms of the Heir to the Tsarevich, and Small Coat of Arms - in two versions.

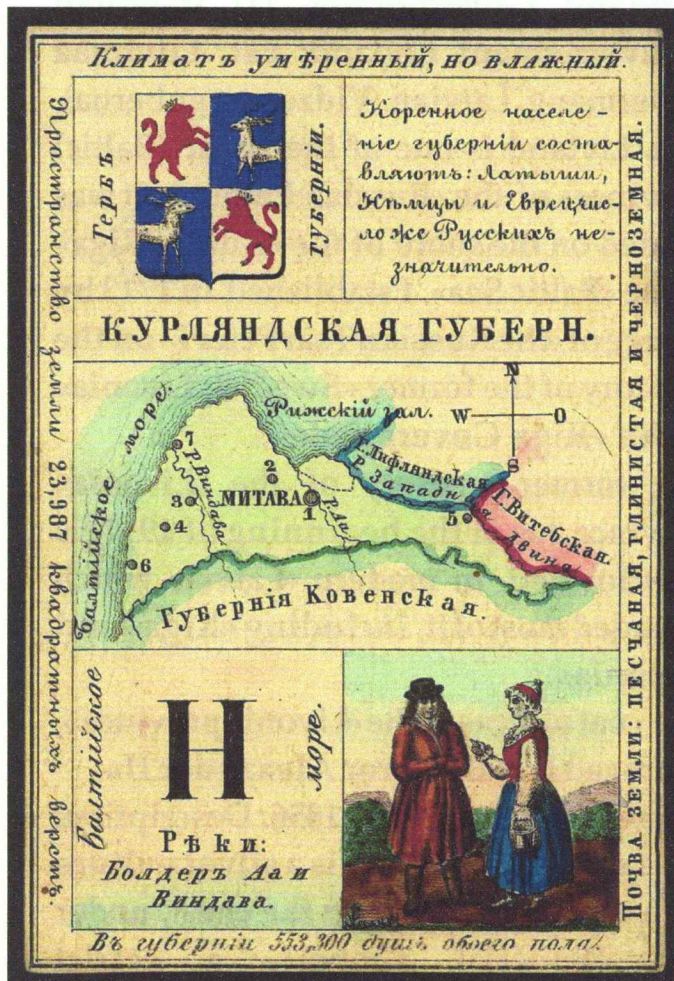

https://ru.wikipedia.org/wiki/Герб_Российской_империи

Coat of arms of «the Baltic Regions» 1882

- «Estland» coat of arms: three azure leopard lions in a golden field;
- coat of arms of «Livonia»: in a scarlet field «a silver vulture with a golden sword and on the chest, under the Imperial Crown, a scarlet monogram «PB IV» (Peter the Second, Emperor of All Russia) »;
- coats of arms of «Courland» and «Semigalsk» four-part field. In the first and fourth silver quarters, there is the coat of arms of «Courland» (a scarlet lion in a scarlet crown). In the second and third azure quarters there is the coat of arms of «Semigalsky» (silver deer, with six shoots on the horns, crowned with the Duke's Crown);
- coat of arms of «Korelsky»: in a scarlet field (two opposed, raised up, hands in silver armor, with silver curved swords above him is a «Golden Crown»).

«Courland Governorate»

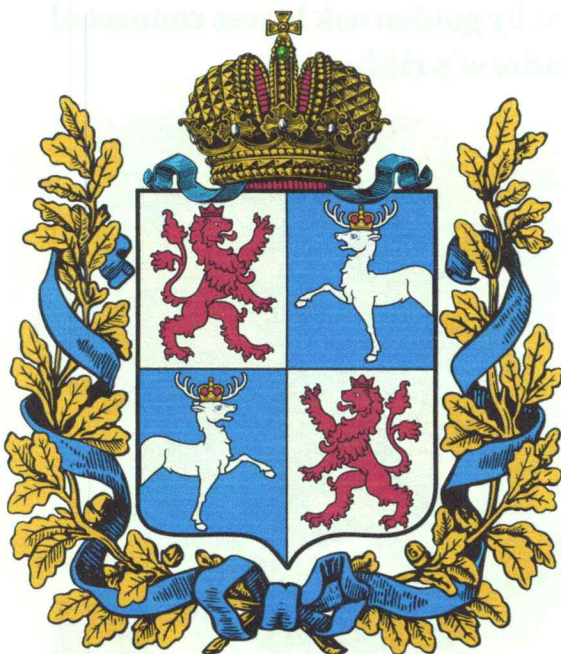

Courland province (1796-1918), also Courland, is one of the three provinces of the «Baltic region» of the «Russian Empire». Provincial city – «Mitava».

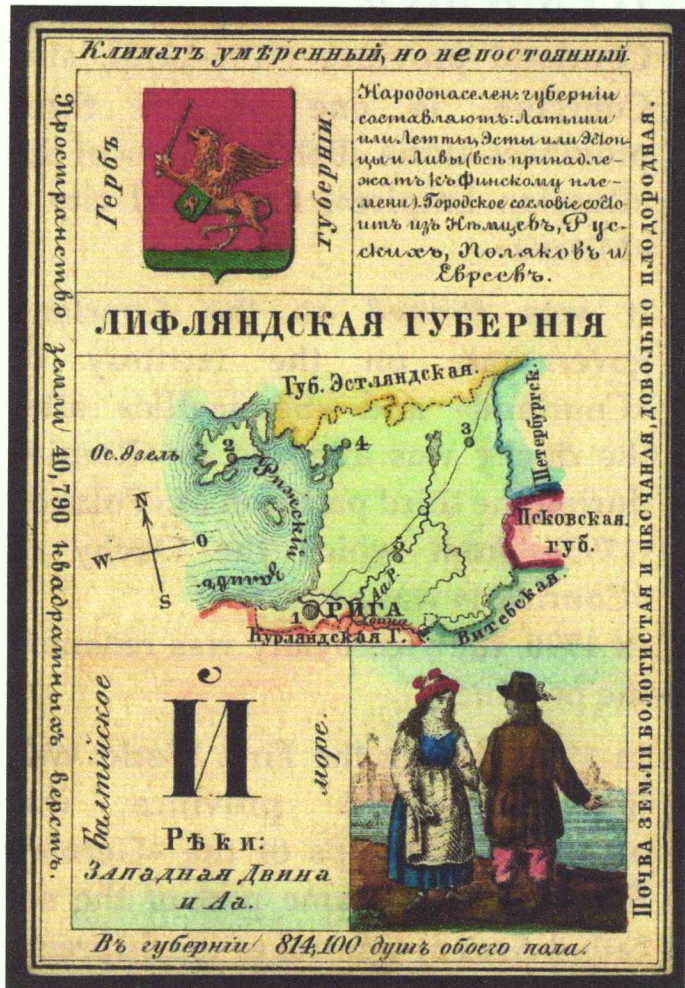

It was formed as the Courland governorate on the territory of «Courland» and «Semigallia» after the duchy was annexed to «Russia» during the third partition of «Poland» (1795), from which the Duchy of «Courland» was a vassal.

In 1796, the viceroyalty was renamed the province.

In 1915, during the First World War, the «Courland» province was occupied by troops of the «German Empire» and became part of the so-called Area of Control of the Supreme Commander-in-Chief of the Eastern Front of «Germany» (Ober-Ost). In 1918, the territory of the former «Courland Governorate» became part of the «Baltic Duchy», and then the «Republic of Latvia» (in 1919 it was part of the «Socialist Soviet Republic of Latvia»).

«Livonia Governorate»

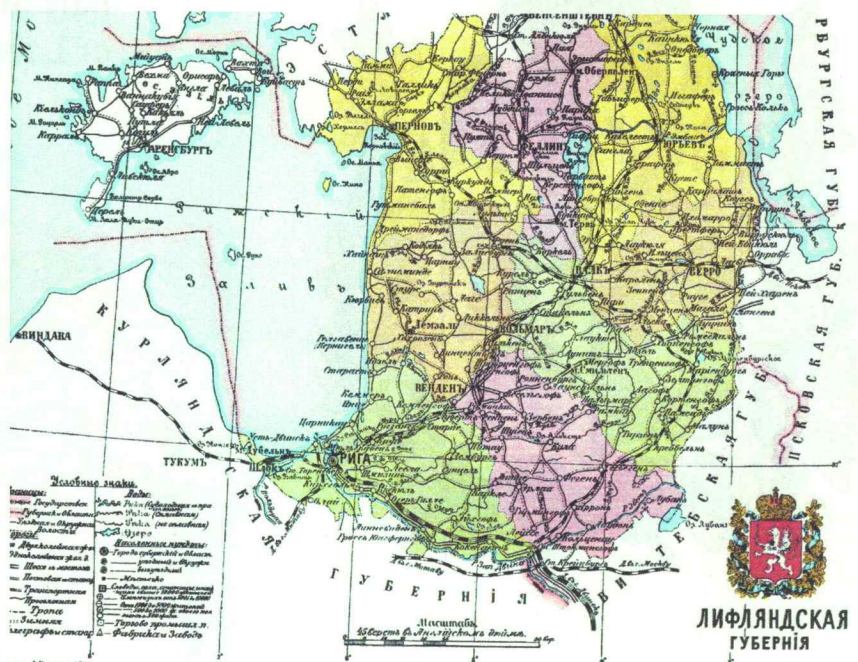

«Livland Governorate» [1] (German Gouvernement Livland; Est. Liivimaa kubermang, Latvian. Vidzemes guberņa), also Livland is one of the Baltic (Baltic) provinces of the «Russian Empire». It was located on the shore of the «Gulf of Riga» in the «Baltic Sea». Established in 1713 by decree of «the Russian Tsar Peter I» on the territory of the former «Swedish Livonia» as the «Riga Governorate».

The former territory of the «Livonia» province (as of the beginning of 1917) is now located in modern «Latvia» which included most of it, including «Riga» and «Estonia».

The coat of arms of the «Livonia province», approved by «Emperor Alexander II».

Approved December 8, 1856. Description: «In a scarlet field there is a silver vulture with a golden sword, on the chest, under the «Imperial Crown», a scarlet monogram (PV IV) (Peter the Second, Russian Emperor). The shield is crowned with the «Imperial Crown» and surrounded by golden oak leaves connected by «St. Andrew's ribbon».

«Estonia Governorate»

The «Estonian province» (German: Gouvernement Estland; Est: Eestimaa kubemang) is the northernmost of the three provinces of the «Baltic region» of the «Russian Empire», stretching in a strip from east to west along the southern coast of the «Gulf of Finland» and ending in an archipelago. Modern «Estonia» was formed by merging the territories of the «Estonian province» and the northern part of the «Livonia province».

Following the results of the «Northern War», between the «Russian Empire» and the «Kingdom of Sweden» on August 30 (September 10), 1721 was signed the «Treaty of Nystadt». «Sweden» recognized the annexation of «Livonia», «Estland», «Ingermanland» and part of «Karelia» to «Russia», and «Russia» pledged to pay «Sweden» compensation in the amount of 2 million efimki (1.3 million rubles) [1]. Thus, «Swedish Livonia» became part of the «Russian Empire», was formed. On its territory the «Riga Governorate», later transformed into the «Livonia Governorate». By decree of Emperor «Peter the Great» dated May 29, 1719, was formed the «Revel Governorate». The province was divided into «counties», initially called «districts» in 1745. By decree of June 3, 1783, the «province» was transformed into the «Revel Governorate» and by decree of «Paul the First» of December 12, 1796, into the «Estland» Governorate».

«Russian Empire» (1721 - 1917)

The «Russian Empire» entered the war when the «German Empire» declared war on it on August 1, 1914. In addition to its territory, «Russia» saw itself as the protector of its fellow Slavs and mobilized in support of «Serbia» on July 30th. In response, «Germany» declared war on «Russia» on August 1, followed by «Austria-Hungary» on August 6; after Ottoman warships bombarded «Odessa» in late October, the Entente declared war on the Ottoman Empire in November 1914.

The «Russian Empire» (Russian doref. Rossiyskaya Imperiya; also, Russian Empire) is a state that existed from 1721 until the February Revolution of 1917 and the proclamation by the «Provisional Government» in September of the same year of the republic. In 1913, the «Russian Empire» occupied the second largest territory in the world (after the British Empire) [3]. It was in «Eastern» and Northern Europe», «Northern and Central Asia», as well as in «Transcaucasia» (until 1867 it also had possessions in «North America»).

The Empire was proclaimed on October 22 (November 2), 1721 at the end of the «Northern War», when, at the request of senators, «Peter I» accepted the titles of «Emperor of Russia» and «Father of the Fatherland».

The capital of the «Russian Empire» from 1721 to 1728 and from 1732 to 1917 was «St. Petersburg» (in 1914-1917 - Petrograd), and in 1728-1732 – «Moscow», which subsequently retained the honorary title of «mother-throne» capital and was the place of coronation of emperors.

At the head of the state was the emperor from the «Romanov dynasty», who until October 17 (30), 1905, had absolute power (with the exception of a short period at the beginning of the reign of «Empress Anna Ioannovna» imposed on her by members of the Supreme Privy Council upon her accession to the throne, when the conditions were in effect, which greatly limited her power).

The political system in 1906, which was established after the adoption of a new edition of the «Basic State Laws», was interpreted by many jurists and politicians as a dualistic form of constitutional monarchy, while the emperor still owned «supreme autocratic power». During the February Revolution, 2 (15 March), 1917, «Emperor Nicholas II» abdicated the throne was formed, and a «Provisional Government» from members of the «Provisional Committee of the State Duma». On September 1 (14), 1917, it proclaimed «Russia» a republic.

February revolution of 1917 in «Russia» (in Soviet historiography - February bourgeois-democratic revolution or the February Revolution, in the West the name March Revolution (English March Revolution, in accordance with the new style calendar) is also often used - mass anti-government protests of «Petrograd» workers and soldiers of the «Petrograd garrison», which led to the overthrow of the «Russian monarchy» and the creation of the «Provisional Government», who concentrated in his hands all legislative and executive power in «Russia». Revolutionary events covered the period of late February - early March 1917 (according to the Julian calendar, which was in force in «Russia» at that time).

According to the 2-nd reform (1796-97), governorships were abolished.

In pre-revolutionary «Russia», along with provinces, regions were introduced - administrative-territorial units corresponding to provinces, located on the outskirts of the state or on the lands of the Cossack troops, usually included in the general governorates.

In 1800 there were 41 provinces: in 1917 - 78 provinces and 23 regions, 777 districts. After the revolution, 25 provinces were transferred to «Poland», «Finland» and the «Baltic states». In 1917-23, 26 new provinces were created.

During the administrative-territorial reform of 1923-30 in the «RSFSR», instead of 56 provinces, 14 large administrative-territorial units were created, incl. 10 regions (4 of them were soon transformed into territories), each of these units was an independent economic unit area.

The negotiated determination of the border takes place in two stages. At the first stage, called delimitation, the actual determination of the passage of the borderline takes place - using maps with the preparation of a description of the passage of the border. At the second stage, called demarcation, the state border is drawn on the ground and marked with boundary markers.

«RUSSIA» - «LATVIA»

The territory of present-day «Latvia» became part of the «Russian Empire» in the 18th century. After the «Northern War» between «Russia» and «Sweden», according to the Treaty of Nystadt in 1721, «Livonia» and «Riga», which formed the basis of «Latvia», passed to «Russia», among other territories. In 1772, during the 1st partition of «Poland», «Latgale» went to «Russia», and in 1795, during the 3rd partition, the «Duchy of Courland» (parts of these territories became part of «Latvia»).

«Duchy of Courland and Semigallia»

The «Duchy of Courland» and «Semigallia» (Latin: Ducatus Curlandiæ et Semigalliæ, German: Herzogtum Kurland und Semgallen, Latvian: Kurzemes un Zemgales hercogiste, Lithuanian: Kuršo ir Žiemgalos kunigaikštystė, Polish: Księstwo Kurlandii i Semigalii) was a duchy in the «Baltic region», then known as «Livonia», that existed from 1561 to 1569 as a nominally vassal state of the «Grand Duchy of Lithuania» and subsequently made part of the «Crown of the Polish Kingdo» from 1569 to 1726 and incorporated into the «Polish–Lithuanian Commonwealth» in 1726. On March 28, 1795, it was annexed by the «Russian Empire» in the «Third Partition of Poland».

There was also a short-lived wartime state with the same name that existed from March 8 to September 22, 1918. Plans for it to become part of the «United Baltic Duchy», subject to the «German Empire», were thwarted by «Germany's surrender» of the «Baltic region» at the end of the «First World War».[3] The area became a part of «Latvia» at the end of «World War I».

Gotthard Kettler,[4] the last Master of the «Livonian Order», became the «first duke of Courland». Other members of the Order became the Couronian nobility, with the fiefdoms they had hitherto held becoming their estates. In all, Kettler received nearly one-third of the land in the new duchy. «Mitau» («Jelgava») as designated was the new capital, and a Landtag was to meet there twice a year.

Several parts of the Courish area did not belong to the Duchy. The Order of «Livonia» had already loaned the «Grobiņa district» (on the coast of «Baltic Sea») to the «Duke of Prussia». Another district, the former «Bishopric of Courland», belonged to «Magnus son of the king of Denmark». He promised to transfer it to the «Duchy of Courland» after his death, but this plan failed and only later did «Wilhelm Kettler regain» this district.

Like the other members of the Order, «Kettler» was «German» and set about establishing the Duchy along the lines of similar «German states». In 1570, he issued the «Privilegium Gotthardinum», which allowed the landholders to enserf the native peasantry on their lands.

When «Gotthard Kettler» died in 1587, his «sons Friedrich and Wilhelm» became the «dukes of Courland». They divided the Duchy into two parts in 1596. «Friedrich» controlled the eastern part, «Semigalia» («Zemgale»), with his residence in «Mitau» («Jelgava»). «Wilhelm» owned the western part, «Courland» («Kurzeme»), with his residence in «Goldingen» («Kuldīga»). «Wilhelm» regained the «Grobiņa district» when he married the daughter of the «Duke of Prussia». He also paid out and regained control over the «Piltene district», but eventually, it fell to the «Polish–Lithuanian Commonwealth». Here he developed metalworking and shipyards, and the new ships delivered the goods of «Courland» to other countries.

The «United Baltic Duchy» (German: Vereinigtes Baltisches Herzogtum, Latvian: Apvienotā Baltijas hercogiste, Estonian: Balti Hertsogiriik), or alternatively the «Grand Duchy of Livonia», was the name of a proposed state during «First World War» that was proclaimed by leaders of the local «Baltic German» *nobility*.

The attempt to establish a new client state of the «German Empire» on the territory of what is now «Latvia» and «Estonia» was made in 1918, during the «German occupation» of the former «Courland», «Livonian and Estonian governorates» of the «Russian Empire» which had ceased to exist after the Bolshevik coup in 1917. The unsuccessful proclamation of «a pro-German duchy» was first made in April 1918.

The proposed ideas for the new state included the creation of a «Duchy of Courland and Semigallia» and of a «Duchy of Estonia and Livonia», which would be in personal union with the «Kingdom of Prussia».

In October 1918, the «Chancellor of Germany», «Prince Maximilian of Baden» proposed to have the military administration in the «Baltic» replaced by civilian authority. The new policy was stated in a telegram from the «German Foreign Office» to the military administration of the «Baltic»: «The government of the Reich is unanimous in respect of the fundamental change in our policy towards the Baltic countries, namely that in the first instance policy is to be made with the Baltic peoples».

On 18 November 1918, «Latvia» proclaimed its independence. «August Winnig» the last representative of the «German government», signed an agreement with representatives of the «Estonian Provisional Government» on handing over power in «Estonian territory» on 19 November.[8] In «Latvia», the «Germans» formally handed over authority to the «Latvian national government», headed by «Kārlis Ulmanis» on 7 December 1918.

The defeat of «Germany» in «First World War» in November 1918, followed by the defeat in 1919 of the «Baltische Landeswehr» and «German Freikorps» units of «General Rüdiger von der Goltz» in «Latvia» by the «3rd Estonian Division» and the «North Latvian Brigade», rendered any ideas for the creation of the «United Baltic Duchy» irrelevant.

To ensure its return to «Latvian» control, the «Baltische Landeswehr placed» was under «British authority». After taking command of the «Baltische Landeswehr» in mid-July 1919, «Lieutenant Colonel Harold Alexander» the future «Alexander of Tunis» gradually dismissed the «Baltic German elements». The «Baltic nations» of «Estonia» and «Latvia» as were established republics.

- 2) «Russian Empire» (1721 - 1917)...

Coat of Arms

«Coat of Arms», the principal part of a system of hereditary symbols dating back to early medieval Europe, used primarily to establish identity in battle. Arms evolved to denote family descent, adoption, alliance, property ownership, and, eventually, profession.

The origin of the term «Coat of Arms» is in the surcoat, the cloth tunic worn over armour to shield it from the sun's rays. It repeated the bearer's arms as they appeared on his banner or pennon and on his shield, and it was particularly useful to the heralds as they toured the battlefield identifying the dead. It also identified the knight in the social surroundings of the tournament. What today is popularly termed a «Coat of Arms», is properly an armorial or heraldic «achievement» and consists of a shield accompanied by a warrior's helmet, the mantling protects which his neck from the sun (usually slashed fancifully to suggest having been worn in battle), the wreath which secures the mantling, and crest to the helmet, and the crest itself (the term for the device above the helmet, not a synonym for the arms). Additions to the achievement may include badges, mottoes, supporters, and a crown or coronet.

GPS ANTENNA

Dimensions: 3" diameter
Weight: 0.24 pounds
This flat disc adheres to the soldier's load-bearing equipment and connects Land Warrior to satellites overhead to allow the soldiers to pinpoint his position and the locations of other Land Warrior-equipped soldiers.

SOLDIER CONTROLLER UNIT

Dimensions: 6.11" (L) x 3.47" (W) x 1.47" (H)
Weight: 1.13 pounds
The soldier control unit acts as a "tactical remote," allowing the warrior to access Land Warrior features such as maps, graphics, satellite imagery and messages with the touch of a finger.

CPU

Dimensions: 9.0" x 7.25" x 2.7"
Weight: 1.5 pounds
The central processing unit contains a microcomputer processor for managing information flow, sending and receiving text messages and storing digital maps, graphics and images.

PELTOR HEADSET

Weight: 1 pound
This is a standard audio headset with a microphone used by combat units. It plugs into Land Warrior for use with the voice radio.

HELMET-MOUNTED DISPLAY

Dimensions: 7.13" x 1.88"
Weight: 0.42 pounds
This component assembles a miniature computer screen that allows the soldiers to view the terrain before him, track the location of his unit members, mark objectives, read text messages and view other mission-related information.

NAVIGATION SUBSYSTEM

Dimensions: 7.04" x 7.25" x 2.95"
Weight: 1.15 pounds
This contains the GPS and digital compass for use in land navigation for tracking the warrior's positioning and heading on a map as well as the positions of fellow Land Warriors.

HELMET INTERFACE ASSEMBLY

Dimensions: 3.60" x 0.75"
Weight: 0.45 pounds
This component links the Helmet Mounted Display to the other components of the Land Warrior System.

After the settlement of controversial issues in «Europe», the need arose to resolve contradictions between the powers in the «Far East», so the «Washington Peace Conference» was held in 1921-1922. Nine countries took part in it: «the United States of America», «Britain», «France», «Italy», «Belgium», «Portugal», «Holland», «Japan» and «China». The final documents were treaties of four, five and nine powers.

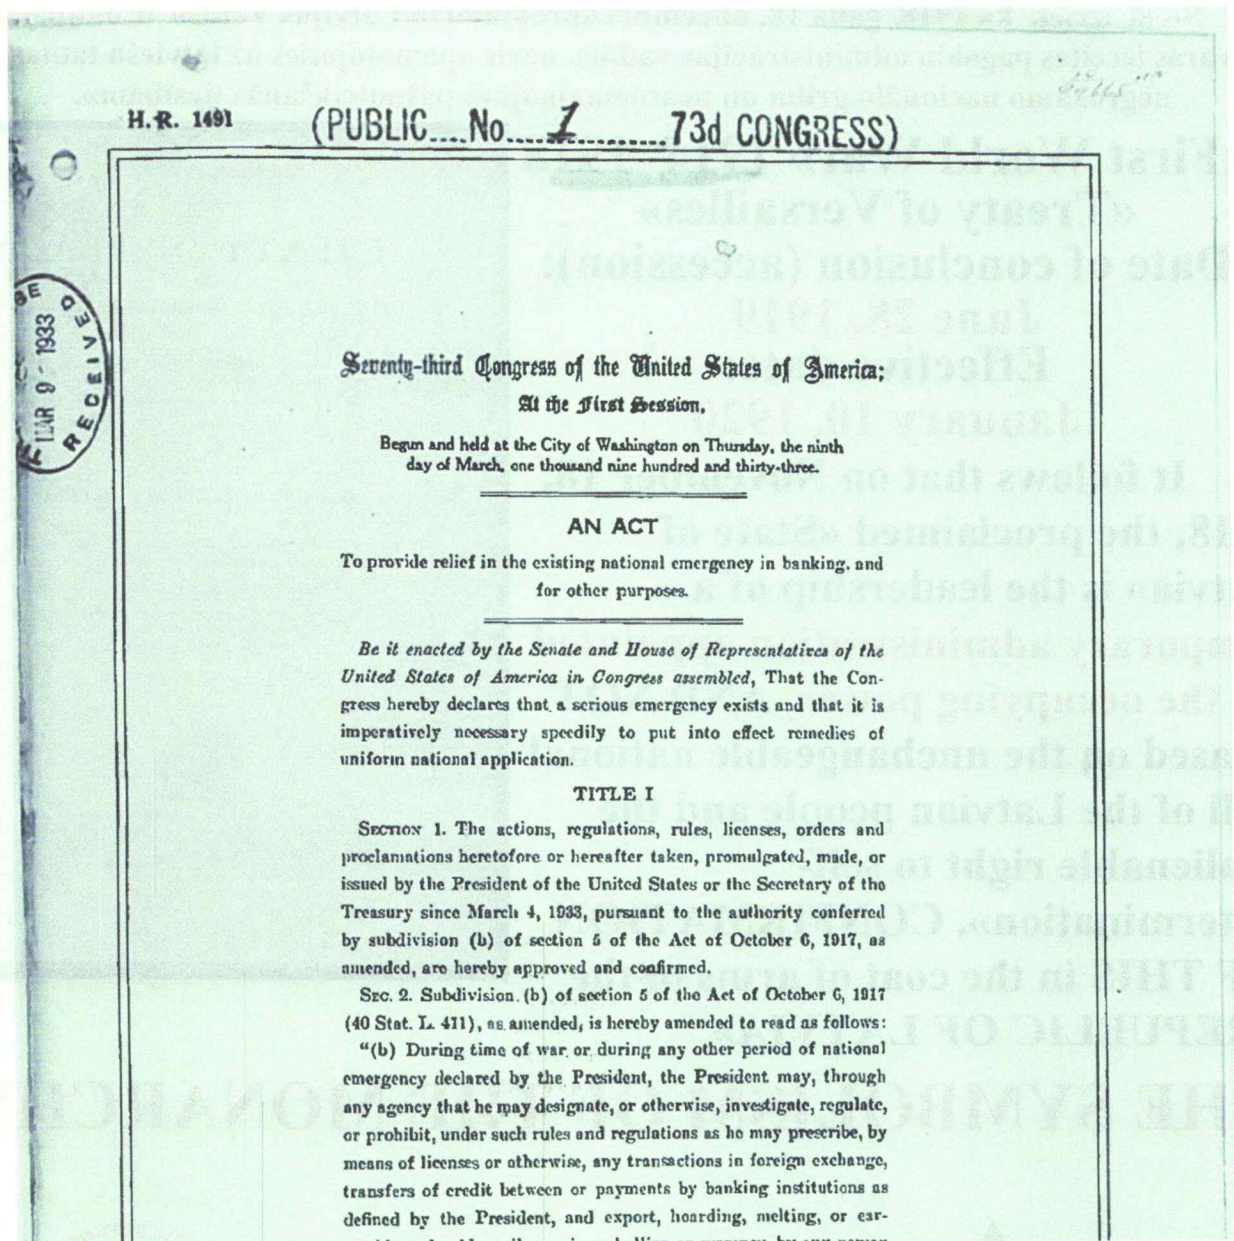

The set of treaties and agreements concluded at «Versailles and Washington» became known as the «Versailles-Washington system». However, this system could not eliminate all controversial issues and contradictions in international relations.

The borders of the new «European states» were determined without considering the opinions of the populations inhabiting these territories.

«The First World War or the Great War (July 28, 1914 - November 11, 1918) is a global military conflict involving 38 countries between two coalitions of states in Europe (the Entente and the Triple Alliance < (1) Entente - a military-political bloc of the Russian Empire, Great Britain and France, (2) Triple Alliance - a military-political bloc of Germany [German Empire (German Reich, German Deutsches Reich; also Kaiser Germany, Kaiserreich, German Kaiserreich; Second Reich)], Austria- Hungary [Austria-Hungary (German). Österreich-Ungarn, Hung. Ausztria-Magyarország; officially from November 14, 1868 - German. k és földek, valamint a Szent István Magyar Korona földjei - Kingdoms and lands represented in the Reichsrat, as well as the lands of the Hungarian crown of St. Stephen; unofficial full name - Austro-Hungarian Monarchy] and Italy [Kingdom of Italy (1861-1946) (Italian. Regno d'Italia) - a state that arose in 1861 during the Risorgimento and united all independent Italian states into a single country under the rule of the Kingdom of Sardinia], formed in 1882), who's fighting also spread to the Middle East, Africa and some parts of Asia. One of the largest and bloodiest military conflicts in human history.

The Civil War was a consequence of the revolutionary crisis that unfolded in Russia, which began with the revolution of 1905- 1907, and worsened during World War I and leading to the fall of the monarchy.

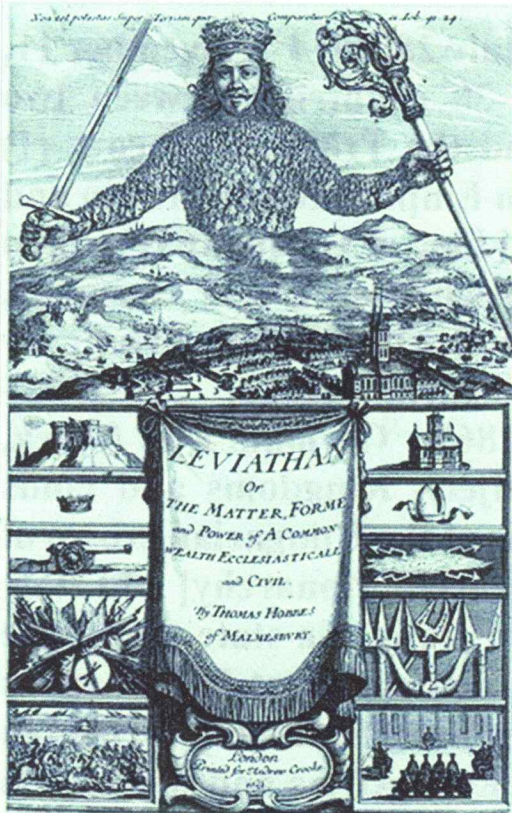

The First World War led to the Russian Civil War.

The Russian Civil War (May 17, 1918 - October 25, 1922/June 19, 1923) was a series of armed conflicts between various political, ethnic, social groups and government entities on the territory of the former Russian Empire.

The main struggle for power during the Civil War was waged between the armed formations of the Bolsheviks and their supporters (Red Guard and Red Army) on the one hand and the armed formations of the White movement (White Army) on the other, which was reflected in the persistent naming of the main parties to the conflict as «The reds» and «The whites» [6]. Both sides intended to exercise political power for the period until their complete victory and pacification of the country.»

The State

The State is a political form of structure of society in a certain territory, a sovereign form of public power, possessing an apparatus of control and coercion to which is subordinate the entire population of the country.

Title page of Thomas Hobbes's essay "Leviathan" (1651), dedicated to the problems of the state

Territory zoning is one of the foundations of the country's governance structure and includes administrative- territorial, economic and military-administrative divisions.

For example, that «state» is not «The Sovereign State» but an «Administration appointed» by an external «power» in a specific territory.

«State Administration Structure Law»

[\[https://likumi.lv/ta/en/en/id/63545-state-administration-structure-law\]](https://likumi.lv/ta/en/en/id/63545-state-administration-structure-law), where it is specifically visible, «the

Republic of Latvia» is only the main element of the Administration, but «private individual - a natural person, a legal person governed by private law or an association of such persons», as the lowest level elements - the population, who are in complete subjugation, and this also explains the type of punishment, such as «administrative punishment».

The fact that the administration called the «Republic of Latvia», is led and controlled «externally» can be seen in the «civil law» file, which uses terms specific only to the United Kingdom.

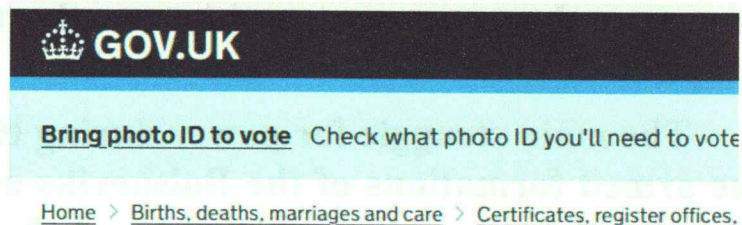

The fact that the administration called the «Republic of Latvia», is led and controlled «externally» can be seen in the «civil law_0» file, which uses terms specific only to the «United Kingdom»:

- 1) «The Supreme Council of the Republic of Latvia has adopted a law»: - «adoption» - meaning that a stranger is accepted from outside, for example «adopts a stranger's child», or «ad - option»;
- 2) «The General Registry Office».

In the territory controlled by the «Republic of Latvia» administration, a completely different name structure:

«Birth list branch, department, brigade».

Why is used a name that absolutely does not correspond to the name of the elements of the territory?

«State» symbol

State symbols are special, usually historically established, distinctive signs (symbols) of a state established by the constitution, special laws or traditions, personifying its national sovereignty and identity.

The main state symbols include the state flag, state emblem, and national anthem. There are also other types of state symbols: national colors, mottos, emblems in the shape of flowers and animals etc.

Due to the age of appearance of state symbols, many constitutions do not even mention them, although sometimes they contain information about the coat of arms or flag. The laws of most states and countries regulate the use of state symbols violation of the law (including «outrage of the flag») in many states and countries can lead to criminal liability.

Similar symbols of territories, federal subjects and administrative-territorial units in many states and countries do not express their sovereignty.

Partijas (Puses) simbolika ir speciālas, vēsturiski oficiāli izveidotas, īpašas partijas (puses) zīmes (simboli), kas oficiāli nodibinātas ar konstitūciju, speciāliem likumiem vai tradīcijām, kas personificē tās nacionālo suverenitāti un identitāti.

Galvenie valsts (Suverēna - Monarhs) simboli ietver valsts / monarhiskais karogs, valsts karogs, monarhiskais un valsts / monarhiskais ģerbonis, monarhiskā himna. Ir arī citi valsts / monarhisko simbolu veidi: nacionālās krāsas, moto, ģerboņi ziedu un dzīvnieku formā utt.

Sakarā ar to, cik sen parādījās valsts simboli, daudzās konstitūcijās tie pat nav minēti, lai gan dažkārt tajos ir informācija par ģerboni vai karogu. Lielākajā daļā štatu un valstu likumi regulē valsts simbolu izmantošanu (tostarp «karoga apgānīšana») daudzos štatos un valstīs var izraisīt kriminālatbildību.

Teritoriju līdzīgie simboli, federāciju subjektu un administratīvi teritoriālo vienību simboli daudzos štatos un valstīs nepauž savu suverenitāti.

Flag

Flag (from Dutch *vlag*) - a panel of regular geometric shape (most often rectangular), having a special color and a certain aspect ratio.

A banner is a one-off piece, while a flag is mass-produced. The national flag is one of the state symbols. In addition to the state, many states have military naval and trade (commercial) flags. Usually, the flag raised is on a special mast (flagpole), is the study of flags *Vexillology*.

Vexillology is an auxiliary historical discipline that deals with the study of flags, banners, standards, pennants and other items of this kind.

The word vexillology comes from «Latin». Vexillum, which designated the banner used by the «Roman legions».

Widespread interest in vexillology emerged in «America and Europe» in the 1960-s. Soon, many specialized periodicals founded were that exist to this day (Czech «Vexillology», «American Flag-Bulletin», «English Flagmaster», «Canadian Flagscan» and others).

In 1962, the first international congress on vexillology took place in the «Netherlands». Vexillology was widely popularized by the books of the «American flag» scientist (flag studies is an alternative name for vexillology) Whitney Smith. Smith's books have been translated into almost all European languages.

War flag

Military flag (battle flag, standard, flag of the army and flag of the armed forces) is a version of the state flag used by the ground armed forces of the state.

The navy, as a rule, has a separate flag - naval. Currently, most states use the state flag as their war flag.

A knight (Jan Van Brabant) carries a heraldic flag in battle (Manessier Codex, 1304).

A naval flag

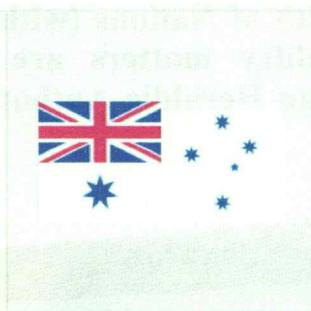

A naval flag is a sign that a warship (vessel) belongs to the armed forces of a given state. It is a panel of officially established colors and shapes. Naval flags appeared in the Ancient World and finally established were in the 16th-18th centuries.

In some states, the naval flag differs from the national flag in color, pattern (for example, «USSR», «Great Britain», «Japan»), or shape («Finland», «Sweden»), or proportions («Guyana», «Dominican Republic», «Pakistan», «France»), or shade («Greece», «Denmark»).

In a number of states, naval flags are the same as the national flag («Austria», «Argentina», «Bahrain», «Belize», «Benin», «Brazil», «Venezuela», «East Timor», «Republic of Haiti», «Guatemala», «Guinea», «Guinea-Bissau», «Democratic Republic of the Congo», «Djibouti», «Dominica», «Indonesia», «Iraq», «Iran», «Ireland», «Iceland» («Coast Guard»), «Spain», «Cape Verde», «Cambodia», «Cameroon», «Qatar», «Republic of Cyprus», «Kiribati», «Comoros», «Republic of Congo», «Ivory Coast», «Cuba», «Kuwait», «Laos», «Liberia», «Lebanon», «Mauritania», «Madagascar», «the Maldives», «Malta», «Mexico», «Mozambique», «the Netherlands», «Nicaragua», «Norway», «Panama», «Paraguay», «Peru», «Portugal», «Romania», «Salvador», «Samoa Northern San Tome and Principia», «Macedonia», «Seychelles», «Senegal», «Saint-Vinadinadi», «Syria», «Slovenia», «United States of America», «Somalia», «Suriname», «Tanzania», «Togo», «Tuvalu», «Tunisia», «Turkey», «Uganda», «Uruguay», «Philippines», «Chile», «Ecuador», «Equatorial Guinea», «Eritrea», «Ethiopia».

a government

As the legal mechanism for authorizing a Privateer by a letter of marque invented was under Admiralty Law, since 1707 the following conditions are required for the actions of a Privateer to be legal:

- (i) A formal declaration of war by the legislative body that has not been extinguished by a treaty of peace and amiability; and
- (ii) The existence of validly constituted Admiralty Courts operated by public officials (that is officials not operating under any letter of marque themselves); and
- (iii) Possession of a valid Letter of Marque issued by the official agents of the legislative body to the Privateer; and
- (iv) The «mark» or «prize» being the enemy property not being protected by any «safe harbor» protection or «safe conduct» registration and that the alleged enemy is accurately enemy that has not declared themselves an ally or reached any formal peace agreement; and
- (v) Clear evidence of belligerence or belligerent intent by the enemy, by either aggression, bad faith, vexation, threat, resistance or possessing arms and weapons.

A Pirate is a 16th Century English legal term describing a sea robber. The word updated was at the start of the 18th Century with the formation of Admiralty Law to mean «one who acts solely on his own authority, without any commission or authority from a sovereign state, seizing by force and appropriating for himself without discrimination»

The word «pirate» comes from the Ancient Greek word *πειρατής* (*peiratēs*) meaning «sea robber; the feared».

Privateers (German *Kaper*), corsairs (French *corsaire*), privateers (English *privateer*) are private individuals who, with the permission of the supreme power of the warring state, used an armed ship (also called a privateer, privateer or corsair) to capture enemy merchant ships (and sometimes ships of neutral powers). The same title applies to their team members.

From 14th Century *Latin declarationem* (as well as English *declaracion* and French *déclaration*) meaning «A written or oral statement of CLAIMS by a PERSON witnessed by an OATH and given with CONSENT». As any STATE and/or CORPORATION is also legally a PERSON, this definition holds legally accurate for statements by electors of a STATE (such as the DECLARATION of INDEPENDENCE). By the 18th Century, the word acquired a more formal legal procedural meaning = «the formal document specifying plaintiff's cause of action, including the facts necessary to sustain a proper cause of action, and to advise the defendant of the grounds upon which action is being pursued»

«formāls dokuments, kurā izklāstīts prasītāja prasības pamats, tostarp fakti, kas nepieciešami, lai noteiktu pienācīgu prasības pamatojumu un informētu atbildētāju par prasības celšanas pamatojumu»

COUNTRY

Count (feminine: countess) is a historical title of nobility in certain European countries, varying in relative status, generally of middling rank in the hierarchy of nobility. Especially in earlier medieval periods the term often implied not only a certain status, but also that the count had specific responsibilities or offices. The etymologically related **English term «county» denoted the territories associated with some countships, but not all.**

In the late Roman Empire, the Latin title denoted the high rank of various courtiers and provincial officials, either military or administrative.

- (i) Damaging or destroying an object (whether in outer space, in the atmosphere, or on earth) by:**
 - (I) firing one or more projectiles to collide with that object;**
 - (II) detonating one or more explosive devices in close proximity to that object;**
 - (III) directing a source of energy (including molecular or atomic energy, subatomic particle beams, electromagnetic radiation, plasma, or extremely low frequency (ELF) or ultra low frequency (ULF) energy radiation) against that object; or**
 - (IV) any other unacknowledged or yet undeveloped means.**

(ii) Inflicting death or injury on, or damaging or destroying, a person (or the biological life, bodily health, mental health, or physical and economic well-being of a person):

(I) through the use of any of the means described in clause (i) or subparagraph (B) Such terms include exotic weapons systems such as:

(II) through the use of land-based, sea-based, or space-based systems using radiation, electromagnetic, psychotronic, sonic, laser, or other energies directed at individual persons or targeted populations for the purpose of information war, mood management, or mind control of such persons or populations; or

(III) by expelling chemical or biological agents in the vicinity of a person.

(B) Such terms include exotic weapons systems such as:

- (i) electronic, psychotronic, or information weapons;**
- (ii) chemtrails;**
- (iii) high altitude ultra low frequency weapons systems;**

ABSTRACT: The present invention provides a method for producing rain or snow from natural atmospheric clouds using seeding agents characterized by a high solubility in water and a large endothermic heat of solution in water. Typical examples of materials suitable for use in practicing this invention are urea, potassium nitrate, potassium nitrite, and ammonium nitrate. Laboratory experiments have shown urea to be effective in producing ice crystals in a vapor cloud having a temperature as high as +6°C. In field experiments, urea has been observed to cause snow showers in supercooled clouds.

Such terms include exotic weapons systems such as--

- (i) electronic, psychotronic, or information weapons;
- (ii) chemtrails;
- (iii) high altitude ultra low frequency weapons systems;
- (iv) plasma, electromagnetic, sonic, or ultrasonic weapons;
- (v) laser weapons systems;
- (vi) strategic, theater, tactical, or extraterrestrial weapons; and
- (vii) chemical, biological, environmental, climate, or tectonic weapons.

Geoengineering

Geoengineering is the artificial modification of Earth's climate systems through two primary ideologies, Solar Radiation Management (SRM) and Carbon Dioxide Removal (CDR)

Carbon Dioxide Removal (CDR)

Carbon Dioxide Removal (CDR) and sequestration. This is artificial trees, ocean fertilization etc. These projects are declassified for the most part. This method of geoengineering IS NOT the focus of this website.

Solar Radiation Management (SRM)

Solar Radiation Management (SRM), controlling sunlight before it reaches the planet.

Stratospheric Sulfate Aerosols Geoengineering (SAG-SRM)

The ability of stratospheric sulfate aerosols to create a global dimming effect has made them a possible candidate for use in geoengineering projects to limit the effect and impact of climate change due to rising levels of greenhouse gases. Delivery of precursor sulfide gases such as hydrogen sulfide (H₂S) or sulfur dioxide (SO₂) by artillery, aircraft and balloons has been proposed. (click image for more...)

Chemtrailing

Chemtrailing is the public's term for the CLASSIFIED ONGOING artificial modification of Earth's climate systems using reflective nano-materials (aerosols) to reflect sunlight. The aerosols are dispersed via jet aircraft trails that expand into reflective artificial clouds.

The U.S. National Science Foundation (NSF) was established by the National Science Foundation Act of 1950. Its stated mission is «to promote the progress of science, to advance the national health, prosperity, and welfare, and to secure the national defense». The NSF's scope has expanded over the years to include many areas that were not in its initial portfolio, including the social and behavioral sciences, engineering, and science and mathematics education. The NSF is the only U.S. federal agency with a mandate to support all non-medical fields of research.

ABSTRACT

The present invention provides a live, attenuated corona-
virus comprising a variant replicase gene encoding polypro-
teins comprising a mutation in one or more of non-structural
protein(s) (nsp)-10, nsp-14, nsp-15 or nsp-16. The corona-
virus may be used as a vaccine for treating and/or preventing
a disease, such as infectious bronchitis, in a subject.

administer

Administer means to carry out a task or give something to someone.

Administer appears in a variety of contexts in the legal field. For example:

A trustee administers the assets of an estate by dispersing, selling, or managing the assets.

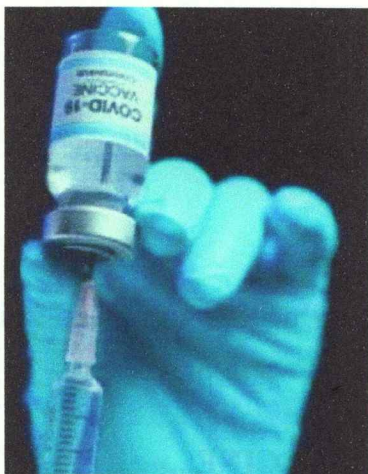

Corporate officers administer the affairs of the company by making transactions, managing employees, hiring lawyers, etc.

An authorized person administers the oath in court by asking questions. Governments administer punishment through sanctions, fees, imprisonment, etc.

A government agency administers the laws of a specific area of law by creating regulations, monitoring specific industries, establishing license requirements, etc.

A nurse administers a vaccine by giving a patient a shot.

The present invention provides a live, attenuated **coronavirus** comprising a variant replicase gene encoding polyproteins comprising a mutation in one or more of non-structural protein(s) (nsp)-10, nsp-14, nsp-15 or nsp-16. **The coronavirus may be use as a vaccine** for treating and/or preventing a disease, such as infectious bronchitis, in a **subject**.

*Šis izgudrojums nodrošina dzīvu, novājinātu koronavīrusu, kas satur replikāzes gēna variantu, kas kodē poliproteīnus, kas satur mutāciju vienā vai vairākos nestrukturālajos proteīnos (nsp)-10, nsp- 14, nsp-15 vai nsp-16. **Koronavīrusu var izmantot kā vakcīnu**, lai ārstētu un/vai novērstu kādu slimību, piemēram, infekciozo bronhītu.*

System and methods for anonymously selecting subjects for treatment against an infectious disease caused by a pathogen

System and methods for anonymously selecting subjects for treatment against an infectious disease caused by a pathogen. The system comprises a plurality of electronic devices comprising instructions to generate an ID (identification number) and, when in proximity of another such electronic device, one or both electronic devices transmit / receive the ID to / from the other electronic device. Then, the score generated based is on a plurality of such received ID. Additionally, based on information received from a server, relevant treatment instructions displayed are to the subjects based on the received information and the score. The server comprises instructions for sending to the plurality of electronic devices the information to be displayed with the relevant treatment instructions, additionally the server and /or the electronic devices comprise instructions to generate a prediction of likelihood of a subject transmitting the pathogen, based on the score of the subject.

CARTAGENA PROTOCOL ON BIOSAFETY TO THE CONVENTION ON BIOLOGICAL DIVERSITY

- (b) «**Contained use**» means any operation, undertaken within a facility, installation or other physical structure, which involves living modified organisms that are controlled by specific measures that effectively limit their contact with, and their impact on, the external environment;
- (d) «**Exporter**» means any legal or natural person, under the jurisdiction of the Party of export, who arranges for a living modified organism to be exported;
- (f) «**Importer**» means any legal or natural person, under the jurisdiction of the Party of import, who arranges for a living modified organism to be imported;
- (g) «**Living modified organism**» means any living organism that possesses a novel combination of genetic material obtained through the use of modern biotechnology;

Definition

Any living organism that possesses a novel combination of genetic material obtained through modern biotechnology.

The Cartagena Protocol on Biosafety 2000 1

Note: In general use the term living modified organism (LMO) is considered to be functionally the same as genetically modified organism (GMO).

THE «POPULUS» IN THE TERRITORY OF «LATVIA» ARE LIKE THE «PRIMITIVE ABORIGINES» - COMPLETELY ILLITERATE. BECAUSE THEY DON'T KNOW ANYTHING ABOUT THE DEFINITION OF «clear title» IN THE «Uniform Commercial Code» AND WHAT THE «ABBREVIATION» MEAN, OR SIMPLY THERE ARE «NO BINDING LAWS AT ALL» FOR THE PIRATES?

TERITORIJĀ «LATVIJA» POPULUS IR KĀ PIRMATNĒJIE ABORIGĒNI – PILNĪGI ANALFABĒTI, JO NEKO NEZINA PAR «Uniform Commercial Code» DEFINĪCIJU «clear title» UN KO NOZĪMĒ «ABREVIATŪRA», JEB VIENKĀRŠI PIRĀTIEM VISPĀR «NAV SAISTOŠI NEKĀDI LIKUMI»?

Clear title is a title free of claims or disputes about ownership. Claims, doubts, or disputes about ownership often arise from liens or encumbrances.

Typically, title searches conducted are to see whether the property has a clear title, as a search of the local public land records should reveal any easements, mortgages, or other encumbrances. When a title has material defects, it is said to have a cloud on the title. Buyers are frequently skittish about purchasing property with clouded titles because they risk having said property taken away. Therefore, establishing clear title is essential for any party who wishes to sell their property.

THERE IS NO MEANING TO ASK «PIRATES» ABOUT «LEGITIMATION», BECAUSE ALL THE SO-CALLED «LOCAL LAWS» ARE FOR INFORMATION ONLY!

Information for «populus»:

A peculiarity of English grammar - «the» used is for the noun «The State», without «the», the word «state» **means only position, state**, not the noun «The State». A peculiarity of «Latvian grammar»: «Latvijas valsts» means «State» from the position with the given name «LATVIJA»:

examples:

bag contents - contents from the bag, the bag is not the contents
road dust - dust on the road, the road is not dust.

Angļu valodas gramatikas īpatnība - «the» lieto lietvārda apzīmēšanai «The State», bez «the» vārds «state» **nozīmē tikai pozīciju, stāvokli**, nevis lietvārdu «Valsts»

«Latviešu valodas gramatikas» īpatnība: «Latvijas valsts» nozīmē «Valsts» no pozīcijas ar piešķirtu nosaukumu «LATVIJA»:
piemēri:

somas saturs - saturs no somas, soma nav saturs; ceļa putekļi - putekļi uz ceļa, ceļš nav putekļi.

Entity Systems Wiki

What's an Entity System?

("Component/Entity System", "CES")

Component/Entity Systems are an architectural pattern used mostly in game development. A CES follows the Composition over Inheritance principle to allow for greater flexibility when defining entities (anything that's part of a game's scene: enemies, doors, bullets) by building out of individual parts that can be mixed-and-matched. This eliminates the ambiguity problems of long inheritance chains and promotes clean design. However, CES systems do incur a small cost to performance.

Concept

A game or application making use of the C/ES pattern involves at least the following:

1. Entity - *A container into which components can be added, usually hierarchical (any Entity can have sub-Entities).*
2. Component - *Class of objects through which behaviors, looks and data can be added to an entity.*

Whereas in an inheritance-based design, an enemy may have a complex inheritance chain such as `Damageable <- Actor <- GroundBasedActor <- Enemy <- ZombieEnemy`, in a C/ES-based design you might have a `Health` component, a `GroundBasedMovement` component and a `ZombieAi` component added to an entity named `ZombieEnemy`.

This eliminates ambiguity issues encountered in an inheritance-based design (should the root be `Actor <- DamageableActor` or `Damageable <- Actor`? Should items be implemented twice as `PickupActors` or `DamageablePickupActors`?). At the same time, components can be freely combined: a damageable inventory item? add the `Collectable` and `Health` components to an entity.

In a pure CES design, entities will not even have positions in the scene. Their location could be provided by an optional `Transform` or `Location` component. Their looks (3D model, sprite, icon) are also components.

Rendering and updating may take place either by traversing the entire entity tree (slow), by having entities register themselves to the respective services (service locator hell) or in a hybrid approach where the renderer/clock system remember which components they found in the tree while entities merely provide a change notification if components are added to them or removed from them, allowing the renderer/clock system to re-check that part of the tree (complex). This aspect of the design is however not part of the C/ES pattern.

ES Terminology

Adam Martin's 2007 articles offered three core concepts:

1. Entity: A unique ID that tags each game-object as a separate item. Implementations typically **use a plain integer for this**.
2. Component: All the data for **one aspect** of the object. Implementations typically use Structs, Classes, or Associative Arrays.
3. System: All the code for the **one aspect** of the gameobjects, with each **System running continuously as if it has a private internal thread**, performing global actions on every Entity that possesses a Component of the same aspect as that System.

"Component" is used to mean both the template/OOP class that holds the data, and the individual instances of that template/class. When this is unclear, we usually say "Component-Type" to mean the class, and "Component Instance" to mean a single instance attached to a specific Entity.

"Aspect" is defined loosely. Originally, we recommended developers to start with "1 component-type per 1 System", but real-world projects rarely stick to this, often having multiple Component-types for a single System — and multiple Systems sharing individual Component-types.

(later updated to rename "System" to "Processor")

This story, which is a political one, differs from the generally accepted history of the Uniform Commercial Code. The Code's drafting "continues to be represented, as a neutral, balanced, expertise-based process."⁷ The reality is that the Code is a political document—the product of political realities of the early 1950s on the state level.

Trust is a form of division of **property rights** and a fiduciary relationship (*maritime*), in which owner *ship (maritime)* of **assets** goes to a third party, known as a trustee, and the beneficial enjoyment goes to the beneficiary. The person who transfers the property into trust is known as the grantor or settler.

Trust is a right, enforceable in equity, to the beneficial enjoyment of property held by another party who actually holds legal title. The property held may itself be called a «trust» especially if it consists entirely of invested money (i.e., a trust fund).

The formation of a valid trust requires:

A settler (the owner of assets) Intent and capacity (the settlor should have intent to create the trust and a capacity to grant their property rights)

A definitive beneficiary (this beneficiary should be reasonably ascertained now or in the future)

A trustee (the person who holds and administers assets in the interests of the beneficiary)

Assets

Legal formalities (the trust should be complying with the law of that jurisdiction such as being in writing, signed, and notarized)

The trustee has fiduciary duties to perform in the interest of the beneficiary. The trustee and beneficiary usually cannot be the same person unless the trustee is not the sole beneficiary. If the trustee resigns, dies, or refuses to act as a trustee, the trust still exists. The court will appoint another trustee, called the successor trustee.

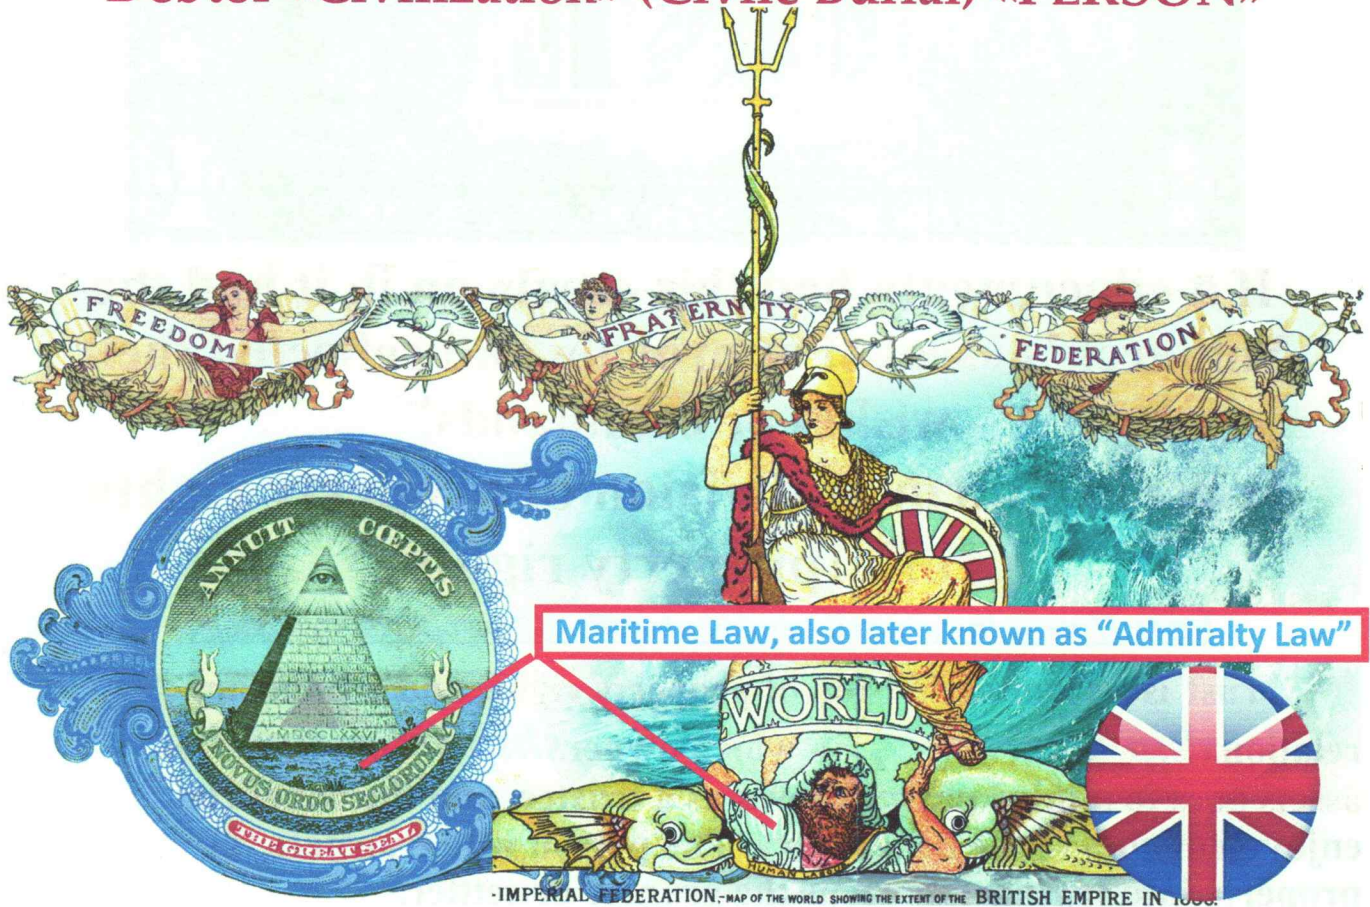

The trust assets are not transferred to the trustee contemporaneously with the signing of the trust instrument. They transferred can be even after the death of the settlor.

PERSONALITY

«From 14th Century Latin personalis = «The quality or fact of being a PERSON». Itself a combination of persona=PERSON and alius = «other, another, someone/something else». At the beginning of the 19th Century, a new definition added was to reflect the real-world fact of unique differences between individuals, namely «A set of qualities that makes a PERSON distinct from another». The use of the word «personality» in the creation of the fictional and extremely dangerous «science» of psychology attested is from the early 20th Century meaning «assumed role or manner of PERSONAL behaviour».

CHfi

chfi - Basel III

Basel III is a document of the Basel Committee on Banking Supervision, containing methodological recommendations in the field of banking regulation and approved in 2010-2011.

The third part of the Basel Accord developed was in response to shortcomings in financial regulation exposed by the financial crisis of the late 2000s. Basel III strengthens bank capital requirements and introduces new regulatory liquidity requirements. The main goal of the Basel III agreement is to improve the quality of risk management in banking, which, in turn, should strengthen the stability of the financial system as a whole (https://en.wikipedia.org/wiki/Basel_III).

«MARITIME LAW» - «Off shore»

Latvia Limited Company (SIA)

<https://www.offshorecompany.com/company/latvia-sia/>

A **Lion** is «a man or a woman» who demonstrates the necessary virtue, piety and wisdom of character required to be anointed ruler and leader of a particular tribe, community or society. It is one (1) of the four (4) very first ancient rights of sovereignty in civilized history first defined by **the Cuilliaéan**.

The word Lion comes from 6th millennium BCE ancient Irish word **Líon** meaning «fulfilled, full, meritous, worthy, courageous» and comes from two (2) ancient Irish words **Lí** meaning «radiant (skin), hue» and on meaning «always, ever». Hence, the literal etymological meaning of **Líon** is “one who is always radiant, in hue»

Holly

O’Cuilleain or **Cuilliaéan** is an extremely ancient Irish name from Gaelic cuileann and primitive Gaelic cuilieann meaning Holly. In pre-Christian Celtic culture and history, **the Holly**

Ilex or **holly** is a genus of over 570 species of flowering plants in the family **Aquifoliaceae**, and the only living genus in that family. Ilex has the most species of any woody dioecious angiosperm genus. The species are evergreen or deciduous trees, shrubs, and climbers from tropics to temperate zones worldwide. The type of species is Ilex aquifolium, the common European holly used in Christmas decorations and cards (<https://en.wikipedia.org/wiki/Holly>).

§ 1-201. **General** Definitions.

- (4) «*Bank*» means a person engaged in the business of banking and includes a savings bank, savings and *loan* association, *credit* union, and *trust* company.
- (27) «Person» means an individual, corporation, *business trust*, estate, *trust*, partnership, limited liability company, association, joint venture, *government*, *governmental* subdivision, agency, or instrumentality, public corporation, or any other legal or commercial entity.

Entity: A unique ID that tags each game-object as a separate item.

Implementations typically use a plain integer for this.

Component: All the data for one aspect of the object. Implementations typically use Structs, Classes, or Associative Arrays.

System: All the code for one aspect of the game objects, with each System running continuously as if it has a private internal thread, performing global actions on every Entity that possesses a Component of the same aspect as that System.

«Component» used is to mean both the template/OOP class that holds the data, and the individual instances of that template/class. When this is unclear, we usually say «Component-Type» to mean the class, and «Component Instance» to mean a single instance attached to a specific Entity.

«Aspect» defined is loosely. Originally, we recommended developers to start with «1 component-type per 1 System», but real-world projects rarely stick to this, often having multiple Component-types for a single System — and multiple Systems sharing individual Component-types.

(later updated to rename «System» to «Processor»)

@ (Commercial «at», informally - «dog») is a typographical symbol in the form of a small (lowercase) letter «a» in an open circle, originally used **in payment documents** in place of the English word at, French à meaning «at [price]» (also English at the rate of - «at [price]», each at - «each / each [unit of goods] at [price]»).

The official name of the mark in accordance with ISO/ITU/Unicode standards is commercial at ([æt]; English commercial at), the same name («commercial «et»») is enshrined in Russian GOSTs. In addition, the name «commercial mark «at»» was used.

In February 2004, the International Telecommunication Union introduced a Morse code for the @ sign (• - - - •) to facilitate the transmission of email addresses. The code combines the Latin letters A and C and reflects their joint graphic writing in the form of a ligature.

Symbol

Symbol (Greek σύμβολον, initially - an identification sign, later - a sign, a symbol in the broad sense) - an image with a figurative meaning, suggesting the unity of form (the appearance of the symbol) and content (the meaning of the symbol) enshrined in tradition, a socio-cultural sign that conveys certain information. The symbol carries a triple meaning: informative, communicative and conservative. In literature - one of the figures of allegory, along with allegory, etc.

Almost all symbolism is of a social nature. Symbols have different contents and belong to social communities and social institutions at any level. Symbolism reflects various aspects of social relations, including social communications.

Since a symbol is a socio-cultural sign, its content is an idea that comprehended is phenomenologically. The content of a symbol usually cannot convey verbally, since this content is revealed through an intuitive correlation of the object image with the meaning embedded in it. The fundamental difference between a symbol and a sign is that the meaning of a symbol does not directly indicate the object it signifies.

A sign becomes a symbol if, when used, a generally significant reaction is assumed not to the actual symbolized object, but to an abstract meaning or, more often, a spectrum of meanings that are conventionally associated to one degree or another with this object. A sign can become a symbol only if the meaning attributed to it is generally accepted for any social community.

The emergence of social symbolism is becoming usually due to social cognition. The existence of language symbolism makes possible the modern level of knowledge about the world around us. All human thinking is symbolic. Letters are symbols of sounds, words are symbols of objects, phenomena, concepts; reality is symbolically reflected in consciousness through speech. Stereotypes of the object of thought are individual in nature, since each symbol is abstract - it is a generalized image that does not reflect the entire essence of a given phenomenon and all its qualities - and is understood by everyone in accordance with the level of his personal acquaintance with the designated phenomenon. Symbols used to denote abstract concepts are even vaguer.

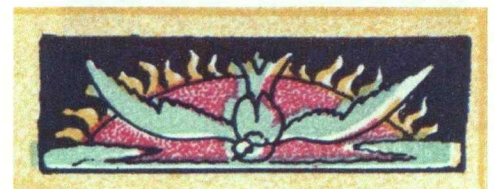

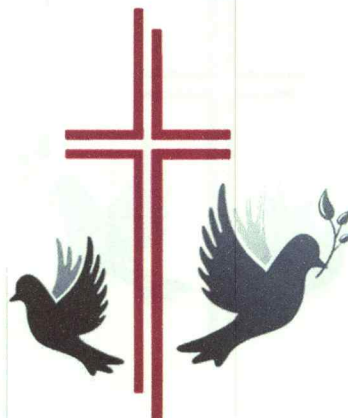

Social symbols reflect people's knowledge therefore they are used, first of all for the purpose of transmitting this knowledge and securing true or false knowledge about a subject of social significance; contributes to the maintenance of existing social relations and their transformation into norms of behavior. Social symbolism can give the form of ritual action during ceremonies perceived as socially significant. Symbolic action historically derives from rational action, which intended is to satisfy a real individual or social need. During changes in productive forces and social relations, rational actions are transformed into traditional-symbolic ones, they can lose their meaning and disappear from practice.

Status symbols serve to consolidate the position of a person, various communities, social institutions and entire societies within the framework of a rank scale or horizontal strata. These symbols appeared in primitive society and have a connection with group identity, including ideas about "their" clan, phratry, and tribe. In state societies, individual former symbols transformed into new symbols. The symbols of prestige differ from symbols of status, including pseudo-symbols of such phenomena as high social status, high level of consumption. For example, someone's consumption of certain expensive goods and services can increase prestige in the eyes of individual people but does not yet indicate an increase in his prestige in society, and certainly does not increase social status.

Symbolism has wide application in artistic creativity and art. The creativity of individual authors creates new artistic symbols that can gain wide recognition and thus become social symbols. Symbolic images in the religious, aesthetic and artistic spheres serve to indicate the connection between the visual and the signified, the concrete and the abstract. A symbol in the aesthetic and artistic senses is a representation that arises a result as of the combination of transcendental meaning and its meaning.

In literature and art, a symbol is considered a sign that has a certain degree of objective specificity but is used to express a meaning that goes beyond semantics, directly given by the objectivity of this sign, or an image that functions as a sign, that is, expressing a meaning foreign to this image, not losing its own semantics, understood as natura.

Simbols

Simbols (grieķu σύμβολον, sākotnēji - identifikācijas zīme, vēlāk - zīme, simbols plašā nozīmē) - attēls ar pārnestu nozīmi, kas liecina par formas (simbola izskata) un satura (simbola nozīmes) vienotību, simbols) nostiprināta, tradīcijās sociāli kultūras zīme, kas nodod noteiktu informāciju. Simbolam ir trīskārša nozīme: informatīvs, komunikatīvs un konservatīvs. Literatūrā - viena no alegorijas figūrām, kopā ar alegoriju utt.

Gandrīz visa simbolika ir sociāla rakstura. Simboliem ir atšķirīgs saturs, un tie pieder sociālajām kopienām un sociālajām institūcijām jebkurā līmenī. Simbolisms atspoguļo dažādus sociālo attiecību aspektus, tostarp sociālo komunikāciju.

Tā kā simbols ir sociāli kultūras zīme, tā saturs ir ideja, kas tiek uztverta fenomenoloģiski. Simbola saturu parasti nevar adekvāti izteikt verbāli, jo šis saturs tiek atklāts caur objekta attēla intuitīvu korelāciju ar tajā ietvertu nozīmi. Būtiskā atšķirība starp simbolu un zīmi ir tāda, ka simbola nozīme tieši nenorāda uz objektu, ko tas apzīmē.

Zīme kļūst par simbolu, ja, to lietojot, tiek pieņemta vispārīgi nozīmīga reakcija nevis uz reālo simbolizēto objektu, bet gan uz abstraktu nozīmi vai, biežāk, nozīmju spektru, kas nosacīti vienā vai otrā pakāpē ir saistīts ar šo objektu. Zīme var kļūt par simbolu tikai tad, ja tai piešķirtā nozīme kļūst vispārpieņemta jebkurai sociālajai kopienai.

Sociālās simbolikas rašanās parasti ir saistīta ar sociālo izzīni. Valodas simbolikas esamība padara iespējamu mūsdienu zināšanu līmeni par apkārtējo pasauli. Visa cilvēka domāšana ir simboliska. Burti ir skaņu simboli, vārdi ir priekšmetu, parādību, jēdzienu simboli; realitāte tiek simboliski atspoguļota apziņā caur runu. Domas objekta stereotipi pēc būtības ir individuāli, jo katrs simbols ir abstrakts - tas ir vispārināts tēls, kas neatspoguļo visu konkrētās parādības būtību un visas tās īpašības - un to saprot katrs atbilstoši viņa līmenim, personīga iepazīšanās ar norādīto parādību. Simboli, ko izmanto, lai apzīmētu abstraktus jēdzienus, ir vēl neskaidrāki.

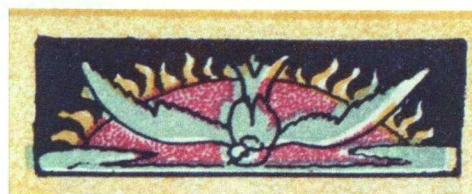

Sociālie simboli atspoguļo cilvēku zināšanas, tāpēc tos, pirmkārt, izmanto, lai nodotu šīs zināšanas un nodrošinātu patiesas vai nepatiesas zināšanas par sociāli nozīmīgu priekšmetu; veicina esošo sociālo attiecību uzturēšanu un pārvēršanu uzvedības normās. Sociālai simbolikai var piešķirt rituālas darbības formu ceremoniju laikā, kas tiek uztvertas kā sociāli nozīmīgas. Simboliskā darbība vēsturiski izriet no racionālas darbības, kuras mērķis ir apmierināt reālas individuālās vai sociālās vajadzības. Mainoties produktīvajiem spēkiem un sociālajām attiecībām, racionālas darbības tiek pārveidotas par tradicionāli-simboliskām, tās var zaudēt nozīmi un izzust no prakses.

Statusa simboli kalpo, lai nostiprinātu personas, dažādu kopienu, sociālo institūciju un veselu sabiedrību pozīcijas rangū skalas vai horizontālo slāņu ietvaros. Šie simboli parādījās primitīvā sabiedrībā un tiem ir saistība ar grupas identitāti, tostarp priekšstatiem par "savu" klanu, frāriju, cilti. Valsts sabiedrībās atsevišķi bijušie simboli tiek pārveidoti jaunos simbolos. Prestiža simboli atšķiras no statusa simboliem, tajā skaitā pseidosimboliem tādām parādībām kā augsts sociālais statuss, augsts patēriņa līmenis. Piemēram, kāda noteiktu dārgu preču un pakalpojumu patēriņš var paaugstināt prestižu atsevišķu cilvēku acīs, bet vēl neliecina par viņa prestiža pieaugumu sabiedrībā un noteikti nepaaugstina sociālo statusu.

Simbolismam ir plašs pielietojums mākslinieciskajā jaunradē un mākslā. Atsevišķu autoru radošums rada jaunus mākslinieciskus simbolus, kas var iegūt plašu atpazīstamību un tādējādi kļūt par sociāliem simboliem. Simboliskie attēli reliģiskajā, estētiskajā un mākslinieciskajā jomā kalpo, lai norādītu uz saikni starp vizuālo un apzīmēto, konkrēto un abstrakto. Simbols estētiskā un mākslinieciskā nozīmē ir attēlojums, kas rodas transcendentālās nozīmes un tās nozīmes kombinācijas rezultātā.

Literatūrā un mākslā simbols tiek uzskatīts par zīmi, kurai ir noteikta objektīva specifika, bet to izmanto, lai izteiktu nozīmi, kas pārsniedz semantiku, ko tieši piešķir šīs zīmes objektivitāte, vai attēlu, kas darbojas kā zīme, tas ir, paužot šim attēlam svešu nozīmi, nezaudējot savu semantiku, saprastu kā dabisku.

«An officer is a person who holds a position of authority as a member of an armed force or uniformed service»

Broadly speaking «officer» means a commissioned officer, a non-commissioned officer (NCO), or a warrant officer. However, absent contextual qualification, the term typically refers only to a force's commissioned officers, the more senior members who derive their authority from a commission from the head of state.

Officer in British English

1. a person in the armed services who holds a position of responsibility, authority, and duty, esp one who holds a commission
2. See police officer
3. (on a non-naval ship) any person including the captain and mate, who holds a position of authority and responsibility radio officer a person appointed or elected to a position of responsibility or authority in a government, society, etc
5. a government official a customs officer
6. (in the Order of the British Empire) a member of the grade below
commander

Does the «Crown» promote and collaborate with pirates?

Does the «Crown» FINANCE CRIMINAL TRANSACTIONS on the «Land»?

Does the «Crown» ADMIT CRIMES AGAINST ALL FORMS AND MANIFESTATIONS OF LIFE, at any altitude in the airspace, in the seas and oceans?

In that case, according to Article 105 of the «Law of the Sea» - PIRATES MUST BE CONVICTED by the Royal «Court and Tribunal»!

Vai «Kronis» veicina pirātus un sadarbojas ar tiem?

Vai «Kronis» FINANSĒ NOZIEDZĪGOS DARĪJUMUS uz «Sauszemes»?

Vai «Kronis» ATZĪST NOZIEGUMUS PRET DZĪVĪBAS FORMĀM UN IZPAUSMĒM, jebkurā gaisa telpas augstumā, jūrās un okeānos?

«United Nations Convention on the Law of the Sea»

Article 105

Seizure of a pirate ship or aircraft

On the high seas, or in any other place outside the jurisdiction of any State, every State may seize a pirate ship or aircraft, or a ship or aircraft taken by piracy and under the control of pirates and arrest the persons and seize the property on board. The courts of the State which carried out the seizure may decide upon the penalties to be imposed and may also determine the action to be taken with regard to the ship, aircraft or property, subject to the rights of third parties acting in good faith.

From the «Republic of Latvia» there is only the company «Embassy of the Republic of Latvia to the Kingdom of Denmark», but none of such «Republic» is REGISTERED, and its supposedly «local laws» for «Latvians» are only INFORMATIONAL on the «Internet gazette» «the Official gazette», but the «ENTITY-Body» actively «play the role» of the false «SOVEREIGN», «The State», «Lords» and «Ladies».

<https://opencorporates.com/companies/dk/35420568>

Irony or cynicism at the highest level: «Article 90 of the «Constitution of the Republic of Latvia» «everyone has the right to know their rights», if in the informative «Official gazette «Latvijas Vēstnesis»» NO SUCH ARTICLE»!

Ironija vai cinisms augstākajā pakāpē: Latvijas Republikas Satversmes 90. Panta, «Ikvienam ir tiesības zināt savas tiesības», ja informatīvajā «Official gazette «Latvijas Vēstnesis»» tāda panta nemaz NAV!

Final conclusion

Since «the Republic of Latvia»/«Latvijas Republika» was only the «administration» of the former territories «Vidzeme», «Latgale», «Kurzeme» and «Zemgale»

<https://likumi.lv/ta/en/en/id/57980-the-constitution-of-the-republic-of-latvia>

which does not correspond to the registration data, because «LATVIA LIMITED» Private limited Company, number 07390210, Dissolved on 8 May 2012,

<https://find-and-update.company-information.service.gov.uk/company/07390210>

The real territory of «LAND» is divided and registered in GOV.UK «Companies House» as two «Private limited companies»:

- 1) «LIVLAND LIMITED», Company number 07597082,
Incorporated on 8 April 2011;

<https://find-and-update.company-information.service.gov.uk/company/07597082>

- 2) «KURLAND»:

- 2.1) «KURLAND LTD», Company number 09230618,
Dissolved on 6 September 2016;

<https://find-and-update.company-information.service.gov.uk/company/09230618>

- 2.2) «KURLAND ESTATES LIMITED» Company number 05290666

<https://find-and-update.company-information.service.gov.uk/company/05290666>

This means that the «Republic of Latvia»/«Latvijas Republika» must have two Licenses from the owners of both «Companies House», which grant the «Right» to one «administration» to manage two properties, each with its own «jurisdiction» (Statutes), without violating the conditions of the Competition, or «the Republic of Latvia»/«Latvijas Republika» is a completely pirated criminal military group, which must be immediately prosecuted and its further activities prohibited in any way and in any form!

Gala slēdziens

Tā kā «the Republic of Latvia»/«Latvijas Republika» bija tikai «pārvaldes administrācija» bijušajās teritorijās «Vidzeme», «Latgale», «Kurzeme» un «Zemgale»

<https://likumi.lv/ta/en/en/id/57980-the-constitution-of-the-republic-of-latvia>

kas neatbilst reģistrācijas datiem, jo «LATVIA LIMITED» Private limited Company number 07390210, Dissolved on 8 May 2012,

<https://find-and-update.company-information.service.gov.uk/company/07390210>

«LAND» reāla teritorija ir sadalīta un reģistrēta GOV.UK «Companies House» kā divas «Private limited Company»:

- 1) «LIVLAND LIMITED», Company number 07597082,
Incorporated on 8 April 2011;

<https://find-and-update.company-information.service.gov.uk/company/07597082>

- 2) «KURLAND»:

- 2.1) «KURLAND LTD», Company number 09230618,
Dissolved on 6 September 2016;

<https://find-and-update.company-information.service.gov.uk/company/09230618>

- 2.2) «KURLAND ESTATES LIMITED» Company number 05290666

<https://find-and-update.company-information.service.gov.uk/company/05290666>

Tas nozīmē, ka «the Republic of Latvia»/«Latvijas Republika» ir jābūt divām Licencēm no abu «Companies House» īpašniekiem, kas piešķir «Tiesības» vienai «administrācijai» pārvaldīt divus īpašumus, katra ar savu «jurisdikciju» (Statūti), nepārkāpjot Konkurences nosacījumus, vai arī «the Republic of Latvia»/«Latvijas Republika» ir pilnībā pirātisks, noziedzīgs, militārs grupējums, kas nekavējoties jāsauc pie atbildības un tālākās tās darbības aizliegumu jebkādā veidā un izpausmēs!

The European continent is surrounded by different seas and diverse coastal zones that are essential to society, economy and nature in general. Climate change, pollution and over-exploitation are among the top threats these areas face. Europe has put in place measures to protect its seas, resulting in some local improvements.

Ó Coileáin (Middle Irish: Ua Cuilén) is a Modern Irish surname generally belonging to the descendants of the last leading family of the Uí Chonaill Gabra, a sept and small but notable overkingdom of medieval and ancient Ireland, based in western County Limerick. Throughout much of their history the Uí Chonaill Gabra were in turn the leading sept of the greater regional overkingdom of the Uí Fidgenti, considered among the highest ranked princes or flatha in all the Province of Munster. Ó Coileáin/Ua Cuilén is most commonly anglicized O'Collins and O'Cullane. The surname has also long been found in County Cork, believed largely due to the migration there, probably in the late 12th or early 13th century, of a junior branch of the County Limerick dynasty.

privateer

Word origin < private + -eer

voluntarius, voluntary (soldier)

<https://www.collinsdictionary.com/dictionary/english/privateer>

Privateers (German *Kaper*), *corsairs* (French *corsaire*), privateers (English privateer) are private individuals who, with the permission of the supreme power of the warring state, used an armed ship (also called a privateer, privateer or corsair) to capture enemy merchant ships (and sometimes ships of neutral powers). The same title applies to their team members.

Conversion is an intentional tort, which occurs when a party takes the chattel property of another with the intent to deprive them of it. Conversion is not applicable to real property.

LATVIA DECISION OF THE SUPREME COUNCIL OF THE REPUBLIC

About state property and so on basic principles of conversion

To create conditions for the transition of the economy to a market relationship principles, putting private as the basis of economic development an initiative to eliminate the state monopoly of economic activity, the national economy would be structurally reorganized, as well as restored justice, the Supreme Council of the Republic of Latvia decides:

1. To be carried out in the Republic of Latvia within the framework of economic reform conversion of state property.

State property conversion includes:

- transfer of state-owned enterprises to the ownership of municipalities,

SHIP - MARITIME LAW

- denationalization of state and local government property,

- privatization of state and municipal property.

<https://likumi.lv/ta/id/65829-par-valsts-ipasumu-un-ta-konversijas-pamatprincipiem>

Conversion is not applicable to **real property**.

The standard remedy for conversion is return of the property in question or damages for the fair market value of the **property**.

<https://www.law.cornell.edu/wex/conversion>

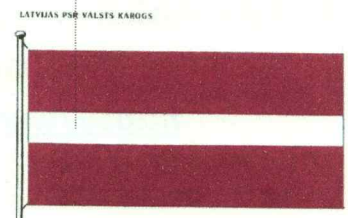

A **privateer** is a private person or vessel which engages in maritime warfare under a commission of war. Since robbery under arms was a common aspect of seaborne trade, until the early 19th century all merchant ships carried arms. A sovereign or delegated authority issued commissions, also referred to as **letters of marque**, during wartime.

The commission empowered the holder to carry on all forms of hostility permissible at sea by the usages of war. This included attacking foreign vessels and taking them as prizes and taking crews prisoner for exchange. Captured ships were subject to condemnation and sale under prize law, with the proceeds divided by percentage between the privateer's sponsors, shipowners, captains and crew. A percentage share usually went to the issuer of the commission (i.e. the sovereign)

Piracy is an act of robbery or criminal violence by ship or boat-borne attackers upon another ship or a coastal area, typically with the goal of stealing cargo and other valuable goods. Those who conduct acts of piracy are called pirates, and vessels used for piracy called are pirate ships. attributes/**tangible** or **intangible**) that owned be can by a person or entity:

«Register of Enterprises of the Republic of Latvia» - **does not appear in the global list of companies, its «registers» «private farms», «private companies», as well as «registered» «banks» with misleading names «akciju sabiedrība» or «AS» in Latvian on the global company registration website, to deliberately hide their true meaning «active society» from foreign users, «registration» payment must be made to a non-existent «bank account», but each «registers» «private farms», «private companies», «association» has its own SEPA CREDITOR.**

Where are the CREDITS< if there is no official «BANK»?

Who actually receives, distributes and manages these «financial instruments»?

It all looks like an illegal «money laundering» scheme.

Only a very small number of SEPA CREDITOR IDENTIFIERS can see on two pages, their number is approximately 350564 and available: <http://dati.ur.gov.lv/register/register.csv>

«Latvijas Republikas Uzņēmumu reģistrs» - globālajā kompāniju sarakstā neparādās, «reģistrē» «privātās saimniecības», «privātās kompānijas», tāpat «reģistrē» «bankas» ar maldinošiem nosaukumiem «akciju sabiedrība» jeb «AS» latviešu valodā globālajā kompāniju uzskaites vietnē, lai apzināti slēptu to īsto nozīmi «aktīva sabiedrība» ārzemju lietotājiem, «reģistrācijas» apmaksa jāveic uz neesošas «bankas» konta, bet katrai «reģistrētai» «privāt saimniecībai», «privātfirmai», «privāt kompānijai», «biedrībai» ir savs SEPA KREDITORS.

Kur tiek ieskaitīti KREDĪTI< ja nav oficiālas «BANKAS»?

Kas īstenībā saņem, sadala un rīkojas ar šiem «finanšu instrumentiem»?

Tas viss izskatās pēc nelegālas «naudas atmazgāšanas» shēmas. Uz divām lpp. redzami tikai ļoti neliels SEPA KREDITORU IDENTIFIKATORI, to skaits ir aptuveni 356978 uz [21.11.2024] un pieejams: <http://dati.ur.gov.lv/register/register.csv>
